
spy from cell phone

Contributed by Rishiraj Singh

You don't need to hire detectives for spy, you can do it from your normal cell phone. It is just a simple trick. Read the whole topic to know the process.

- Activate the "Automatic Answer" in the headset profile of your cell phone and set the ringing volume to "Mute".
- Short-circuit the left middle and right pins on the bottom of the mobile phone with all connections touching each other this will activate profile "Headset".
- If you can't do this just keep your earphone connected to mobile.
- Now place it under a table in a room and call it.
- Now you can use your phone for checking out what people are talking about in a room. Just call on your phone.
- The phone receives the call without ringing and you can listen to what people are saying.
